NEWS RELEASE

Canadian Timely Disclosure Pack – For Release 16 July 2007

Seprotech Receives New Orders Valued at \$1.4 Million

OTTAWA, ONTARIO, 16 JULY 2007.

Seprotech Systems Inc., a Canadian Environmental Technology Company and manufacturer of water and wastewater treatment systems, is pleased to announce four new orders totalling approximately \$1.4M CAD. The new orders come from clients in the resource sector and include two repeat customers. It is the practice of Management not to publicly release sales orders valued at less than \$250K CAD.

“Three of the new orders were generated through our recent product distribution agreement with Raymac Environmental Services of Nanaimo, BC. We are extremely pleased with this early success and with our strong working relationship with Raymac. We look forward to doing much more in the future,” said Martin J. Hauschild, President & CEO. “I’m happy to report that Management’s strategy to expand rapidly into key markets through partnerships and licensing is showing early results”.

“The international mining sector continues to be a strong revenue driver for the Company and the repeat clients demonstrate the confidence held by our customers in Seprotech’s proven technology and treatment solutions”, continued Hauschild. “With an expanding proprietary technology base, Seprotech is well positioned to address growing global concerns on the sustainability of water resources.”

Seprotech is a provider of pre-engineered water and wastewater treatment plants to the land development, mining, industrial and military market place, including membrane-based water treatment systems and the ROTORDISK® biological wastewater treatment systems.
