### **Seprotech Receives New Orders Valued at \$575,000**

OTTAWA, ONTARIO, 17 JANUARY 2007.

Seprotech Systems Inc., a Canadian water and wastewater treatment systems manufacturer, is pleased to announce two new orders totalling approximately \$575K. These orders are in addition to the \$4.6M announced in December 2006.

One of the orders comes from a repeat customer in the municipal sector and represents the application of new advanced tertiary wastewater treatment technology, and the other is for wastewater treatment of a mining operation in Quebec.

“Operational improvements and product standardisation have increased our growth potential and we remain on track for record revenues this fiscal year”, said Martin J. Hauschild, President & CEO. We are succeeding in applying our new environmental technologies and generating revenue from our substantial marketing and R&D investments. With an expanding proprietary technology base, Seprotech is well positioned to address growing public and political concerns on environmental issues.”

Seprotech is a provider of pre-engineered water and wastewater treatment plants to the land development, industrial and military market place, including membrane-based water treatment systems and the ROTORDISK® biological wastewater treatment systems.
