NEWS RELEASE

Canadian Timely Disclosure Pack – For Release 24 July 2008

Seprotech Receives New Orders Valued at \$3.0 Million Record Monthly Orders of \$4.4 Million in July

OTTAWA, ONTARIO, 24 July 2008.

Seprotech Systems Inc., a Canadian water and wastewater treatment systems manufacturer, is pleased to announce new orders totalling approximately \$3.0M CAD. The new orders include a \$2.44 M project with a customer in the mining industry. These orders are in addition to the \$1.4M of sales announced on 02 July 2008.

“I’m pleased to report record monthly orders of \$4.4M in July for Seprotech”, said Martin Hauschild, President & CEO of Seprotech. “The new orders add to our growing backlog, which sets another record for Seprotech at \$6.1M. The Company is well positioned moving forward into next fiscal year as the benefits of the PJH Equipment Corp. acquisition and the outsourcing of manufacturing to Mexico are realized”, added Mr. Hauschild.

“The \$2.44M order comes from a repeat customer in the mining sector and represents the application of Seprotech’s wastewater treatment technology at a site in Latin America”, continued Mr. Hauschild. “Not only were we able to offer a technically superior solution but a key element in being awarded the project was price competitiveness. The measures we have taken to improve competitiveness over the last two years are paying off in a challenging North American manufacturing environment.” concluded Mr. Hauschild.

The remaining orders of approximately \$550K are for standardized ROTORDISK® package plant wastewater treatment systems that are destined for land developers and mining companies.

Seprotech is a provider of pre-engineered water and wastewater treatment plants to the land development, industrial and military market place, including membrane-based water treatment systems and the ROTORDISK® biological wastewater treatment systems.
